

Your DOS games folder

This folder has been created by Boxer as a place to keep your DOS games: Boxer will put new games here when it imports them.

Boxer has stocked this folder with free DOS games for you to try: just double-click on a game to start it up. [**Check out the Boxer website**](#) for other sample games, and tips on where to find more DOS gaming goodness.

You can **rename this folder or move it wherever you like** – Boxer will still find it. Feel free to throw away this document once you're done reading.
